Please be advised that Alameda County Department of Environmental Health, the Local Enforcement Agency (LEA) for CalRecycle, has received and approved a Report of Facility Information (RFI) Amendment per Title 27, California Code of Regulations (27 CCR), Section 21665(c). This public notice was prepared pursuant to Title 27 CCR 21660.1.

Project Description: Alameda County Industries (ACI) is an existing transfer/processing facility operating under a full Solid Waste Facility Permit issued on January 3, 2012. The application package to amend the RFI requests the following changes:

1. Remove existing infeed conveyor and replace it with a new and repositioned infeed conveyor;
2. Install a new Old Corrugated Cardboard (OCC) screen (to improve recovery of OCC) and divert additional materials from the waste stream utilizing new sorting stations;
3. Install new catwalks and platforms to allow access to equipment;
4. Install new conveyors to move residuals to a new outdoor compactor that will directly load transfer trailers, reducing the need to store and bale residuals;
5. Construct 2nd floor mezzanine in the MRF Building to house relocated restrooms, lunch room, and supervisor office;
6. Provide bale storage and Household Hazardous Waste / ABOP (aerosol, batteries, oils and paint) storage under the 2nd floor mezzanine.

The LEA finds that the proposed changes are consistent with all applicable certified and/or adopted California Environmental Quality Act (CEQA) documents, is consistent with State Minimum Standards, and does not conflict with the terms and conditions in the current Solid Waste Facility Permit.

For Additional Information: To review a copy of the application and supporting documents, please contact Ms. Hogan or Ms. Auyeung.
