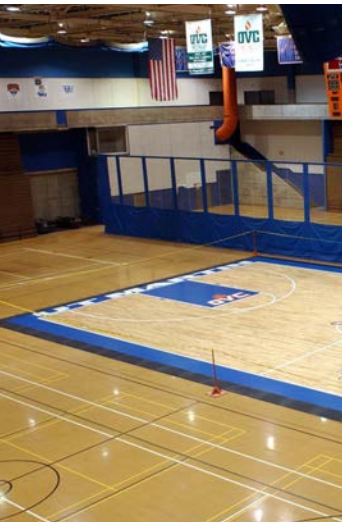
CourtEdge™ Reducer Applications

SCHOOL'S & PARK'S

Reducers surround a synthetic turf installed on top of an asphalt play-ground to create a football field; making it easily accessible, compliant, safe, and they are UV stable with no load weight limitations.



GYMNASIUM'S

Used in doorways and to surround new and old flooring for compliance and accessibility.

STADIUM'S

Recycled rubber reducers, opposed to other materials, make for a safe "injury free" solution to removing vertical barriers.

CourtEdge™ REDUCERS

Variety of sizes and 6 colors to choose from
