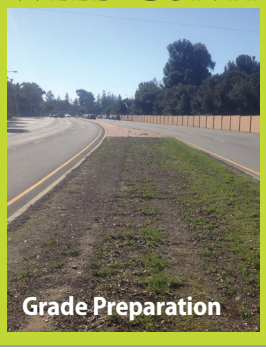
Sierra Mat & Rubber Company

Weed Control

Santa Clara County Roads & Airports Department

Weed Control Made Easy …

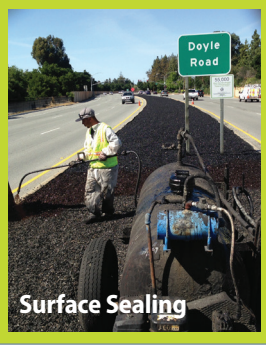


Grade Preparation

Install Weed Fabric

Material Delivery

Material Spread



Surface Sealing

Non-Sealed / Sealed

Funded in part by CalRecycle Grant.

Sierra Weed Control eliminates the need for supplemental water from irrigation providing a sustainable aesthetic landscape with tremendous benefits. The ground preparation is graded; weed fabric is installed to stop unwanted weeds and grasses; the tire-derived material made of 100 percent California recycled scrap tire rubber nuggets is spread; and the surface areas is covered by a protective emulsion coating. The weed abatement system provides superior performance, durability, reduces fire hazards created by vegetative growth and provides public safety.

Applications

- Vegetation Management
- Highway Medians
- Airports
- Residential
- Commercial & Industrial

Benefits

- Permeable Surface
- Water Conservation
- Eliminate Spraying Herbicides
- Xeriscaping
- Minimal Maintenance
