Turning Tires Into Tiles!

Swisstrax is one of the country's top producers of interlocking floor tiles made from recycled tires. We know that buyers of automotive specialty products appreciate and demand superior performance, which is why our recycled rubber tiles, **Rubbertrax**, are designed to be one of the longest-lasting, highest valued recycled flooring systems for garages and work areas.

Rubbertrax recycled rubber flooring from Swisstrax comes in black, and keeps thousands of tires out of landfills every year. The **Rubbertrax** recycled flooring also includes anti-fatigue tiles which are a great addition to work areas that get extended standing times.

Rubbertrax recycled rubber flooring from Swisstrax has been LEED Certified because it contains 100% post-consumer recycled content and is the only recycled rubber flooring tile of its kind. **Rubbertrax** flooring is made almost entirely from materials in the local region.

Studies by the U.S. Environmental Protection Agency show that more than two million tons of used carpet are dumped into the nation's landfills annually. **Rubbertrax** flooring keeps tons of material out of landfills. **Rubbertrax** enables consumers to purchase a superior product with the added benefit of protecting the environment.

Specifications

- Made from PolyDyne Engineered Rubber Powder.
- Resistant to most chemicals.
- PP & Polydyne material
- Temp resistance: -28°F to 248°F
- Standard Test DIN 18032, NFSI, WGEG
- No pollution to drinking water

Tile Size Info

- 13" x 13", Height 0.5"
- 15.75" x 15.75", Height 0.75"

Applications

- Garages
- Showrooms
- Event floors
- Display pads
- Workshops
- Patios
