Rubberway® Permeable Rubber Paving Solutions

SUSTAINABLE & ECO-EFFICIENT

Rubberway Pervious Pavement systems are constructed of a recycled crumb rubber granulate that is pigmented in seven color options, and when combined with a high quality polymer, creates a flexible, open grid surface, allowing for rapid drainage.

Design variations such as rubber and rock are available to suit a myriad of surfacing applications and will produce a firmer surface.

FLEXIBLE & ERGONOMICAL

Benefits

- Freeze/Thaw Friendly
- Diverts Tires from Landfills
- Quick Filtration & Drainage
- No Heavy Metal Leaching
- Manages Storm Water Run Off
- Preserves Trees and Shrubs
- Water Repellant Binder
- Light Vehicular Traffic
- Reduces Liability Risks
- Resilient, Yet Firm Structure
- Replicates Asphalt & Stone
- Versatile Design Options
- Easy to Install & Maintain
- Technical Training Programs

Applications

- Treewells
- Pathways
- Blacktops
- Trails
- Cart Paths
- Sidewalks
- Porous Pavements
- Tracks
- Parking Lots
- Erosion Control
- Emergency Lanes
- Stormwater Management
