SpectraBound Tile

Safety Playground Surfacing

SpectraBound Tile safety playground surfacing may be used to provide ADA access to existing playgrounds, to retrofit existing play areas, or to fill entire new playgrounds with quality rubber surfacing that stays in place during use.

The factory-molded tiles are available in three top designs: Pigmented, EPDM and UltraTop (a super high-density 3mm layer of Spectra EPDM granule sheeting molded directly into the tile). UltraTop is the highest density top layer available on the market.

SYSTEM DATA

- Factory-molded tiles
- 24"x24" tiles with varying thicknesses
- Colors: Pigmented top in 4 standard plus blends and special requests, EPDM top in 20 plus blends, UltraTop in 14 blends and black
- Porous tiles may be installed over concrete or asphalt surfaces
- Typically used outdoors
- Conforms to requirements of the ADA
- IPEMA Certified
  - ASTM F1292 for head impact protection
  - ASTM F1951 for wheelchair accessibility
- Available for LEED® credits
