PolyTurf®
Covering New Ground

Setting New Standards for Sustainable Sports Surfacing with Mini Pitch Fields

Green System Advantages

- ✓ Great for Storm Water Drainage
- ✓ No Heavy Metal Leaching
- ✓ End-of-Life Recycling Solutions

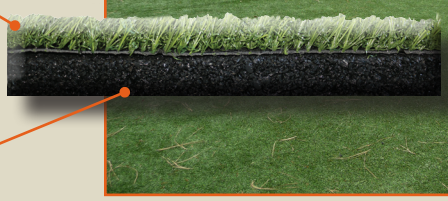
Safety Value

- ✓ Guaranteed Shock Absorption Throughout the Useful Life
- ✓ Increased Player Protection
- ✓ Uniform Play Conditions at all Times

The Next Community Grass Roots Movement

PolyTurf's development team set a new standard with the installation of a PolyTurf Champion Sport "Green" field. This technological advancement provides the optimum choice for a multi-purpose, two layer, non infill system which includes a resilient porous rubber pavement base layer, creating less maintenance, a full life cycle management program and a safer playing environment.

CHAMPION SPORT WITH COOL REFLECT FIBER	Featuring a Synthetic "Cool" Fiber, with a SRI Value 33, reduces heat absorption up to 20 degrees
RUBBERWAY PERVIOUS PAVEMENT UNDERLAYMENT	In-situ porous, recycled rubber pavement layer eliminates the need for loose fill rubber in-fill, diverts tires from local landfills, and meets Gmax 99



Providing Vertical Integration through Design, Development, Installation, and Manufacturing
