GroundRubber Solutions™ by West Coast Rubber Recycling

GroundRubber Crumb

GroundRubber Crumb enhances the performance of molded rubber products, playground surfaces, synthetic turf, sport fields, flooring, roofing and more. Crumb rubber adds cushioning to sport and play surfaces. Crumb rubber, a size reduced 3/8" or smaller granule, is produced from two primary feedstocks, tire buffings and scrap tire rubber. On average 10 to 12 pounds of crumb rubber can be derived from one passenger tire. GroundRubber Crumb saves our environment by using one tire at a time.

Applications

- Synthetic Turf
- Sport Fields
- Golf Courses
- Dog Parks
- Animal Care Facilities

Benefits

- Excellent drainage
- 100% California recycled tires
- Does not decompose
- Environmentally safe
- Long lasting
- 99.9% steel free
- Cost-saving alternative

Colors

- Black

Sizes

- 10-14 mesh
- 10-16 mesh
- 10-20 mesh
