SpectraPour CA

Safety Playground Surfacing

SpectraPour CA safety playground surfacing is designed to meet the requirements of the California CalRecycle TDP grant program. SpectraPour CA uses a special blend of California-derived recycled tire materials, which meets the program's requirement. Other than changes to the cushion matrix, SpectraPour CA is visually identical to SpectraPour, and has similar requirements for sub-base setup and installation.

For qualifying agencies, municipalities, school districts and other grant recipients, SpectraTurf will provide assistance and grant certification for owners working within the CalRecycle grant programs when using SpectraPour CA.

SYSTEM DATA

- Multi-layer system – mixed, poured & troweled on-site
  - Base layer(s) of shock-absorbing rubber material
  - Half-inch-thick wearing surface of rubber granules
- Available in 20 colors (colors can be mixed)
- Create custom shapes and designs
- Porous system may be installed over Type 2 road base, concrete or asphalt surfaces
- Typically used outdoors
- Conforms to requirements of the ADA
- IPEMA Certified
  - ASTM F1292 for head impact protection
  - ASTM F1951 for wheelchair accessibility
- Available for LEED® credits

SpectraPour CA is mixed on-site, and may be used to provide ADA access to existing playgrounds, to retrofit existing play areas, or to fill entire new playgrounds with quality rubber surfacing that stays in place during use.
