### **Introduction**

Please be advised that the County of Solano Solid Waste Local Enforcement Agency (LEA) received and accepted an application package from Recology Vallejo to obtain a new SWFP to operate a Large Volume Transfer/Processing facility. The LEA is certified by the California Department of Resources, Recycling and Recovery (CalRecycle) to enforce state laws and regulations at solid waste facilities within the County of Solano.

### **Description of Project**

The Recology Vallejo facility currently processes approximately 177 tons per day (tpd) mixed recyclables (cans, bottles, paper, etc.) and green waste. Under this proposed permit the facility would be allowed to increase its permitted daily processing capacity up to maximum 300 tpd of mixed recyclables and "organics" (green and food waste). The proposed permit allows for the inclusion of food waste into the existing green waste collection service, but the facility would not be permitted to receive Municipal Solid Waste (MSW) or construction and demolition (C&D) materials, nor perform any composting on site. As the food waste would be collected as part of the existing collection routes only a minor increase in traffic is expected. The SWFP would apply to the entire 9.36 acre property and would include both the recycling and food/green waste activities.

**Informational meeting**

Pursuant to Title 27 of the California Code of Regulations (CCR) section 21660.2 a public informational meeting on this application for a new full SWFP will be held on October 1, 2014. The purpose of the informational meeting is strictly informational - to provide information related to the proposed permit, describe the process and timeline for permit issuance and provide an opportunity for the public to provide input into the permitting process. No official decisions will be made at this meeting.

**Informational meeting details:**
