Cal Recycle
Susan Markie, Permitting & Assistance Branch Chief
Waste Permitting, Compliance & Mitigation Division

Due to the fact that our current general liability carrier will not sign CalRecycle Form 146, we are requesting an extension of the mandatory 180 day from receipt of finished application limit during which CalRecycle must issue or deny the permit.

This is a formal request for extension of time to process our application for Major Waste Tire Facility, pursuant to Title 14 Section 18425 California Code of Regulations. The purpose of this request is to allow Golden to obtain a signed Form 146, Certificate of Liability Insurance. We are requesting an extension to October 26, 2015 to complete the liability application and approval process with a different company and to obtain and to submit the required signed form.

Thank you

Karen Barstow, CFO
Golden By Products, Inc.
