Photo Report for the City of Wasco

11/11/13-11/15/13, 4/16/14-4/18/14, 1/26/15-1/28/15, 5/11/15-5/14/15, 4/25/16-4/26/16

Residential Curbside Waste and Recycle Carts

Picture 1: Residential curbside 300-gallon shared waste container contained significant recyclables.

Picture 2: Residential curbside waste cart contained significant clean recyclables.

1

2

Residential Curbside Green Waste Loads

Picture 3: This represents residential green waste loads which contained approximately 20-30 percent contamination (trash and large branches).

Picture 4: Green waste is sorted through a star screen to remove the contamination (trash and large branches). Contamination is in front of picture. Recoverable green waste pictured on left back side of star screen.

3

4

Residential Trash Loads at the Landfill

Pictures 5 & 6: These represent residential waste loads which contained up to 30 percent divertible materials (green waste and recyclables).

5

6

Commercial Waste Bins

Picture 7: Waste bins observed contained up to 35 percent recyclables.

Picture 8: Even with recycle bins (blue bin at far right of picture) improper separation of materials was observed. The center bin is a waste bin.

7

8

Commercial Waste Loads at Landfill

Picture 9: This is representative of commercial waste loads, which contained approximately 30 percent recyclables.

Picture 10: This is representative of a waste load from Wasco State Prison, which contained approximately 5-10 percent recyclables.

9

10

Multi-Family Waste Bins

Picture 11: This is representative of materials observed in multi-family waste bins.

Picture 12: Staff observed at a majority of multi-family complexes space for recycling bins is not a limiting factor.
