- Agriculture Land Application of Compostable Material

- Three Part Test/Green Material Contamination

Implementation of Directives

- Definition of Food Material

- BMPs – co-composting food and green materials

- ADC demonstration guidance

- Monitoring of DTSC and Auto Shredder Waste ADC

- Conversion Technology

Regulatory Review Update

In Review

Compostable Material Storage Limitations

Final draft of white paper completed

Recommendation:

Initiate an informal rulemaking process to clarify the materials to be included in the calculation of the limit of 12,500 cubic yard regulatory threshold for all Green Material Composting Operations and Agricultural Material Composting Operations, specifying how “stabilized compost” [14 CCR 17852.(a) (36)] is not to be included when specific criteria (to be determined) are met.
