

STATE OF CALIFORNIA CALIFORNIA INTEGRATED WASTE MANAGEMENT BOARD

Base Year Modification Request Certification

Part 1: Generation Study - No Extrapolation Diversion Data

To request a substitution for a previously approved base year used in calculating the diversion rate for your jurisdiction, please complete and sign this form and return it to your Office of Local Assistance (OLA) representative at the address below, along with any additional information requested by OLA staff. When all documentation has been received, your OLA representative will work with you to prepare for your appearance before the Board. If you have any questions about this process, please call (916) 341-6199 to be connected to your OLA representative.

Mail completed documents to:

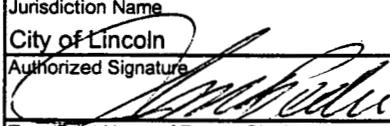

**California Integrated Waste Management Board
Office of Local Assistance
1001 I Street, (MS-25)
PO Box 4025
Sacramento, CA 95812-4025**

General Instructions:

Please select the **ONE** choice below that best explains your request to the Board.

- 1. Use a recent generation-based study to calculate our current reporting year generation amount, but not officially change our existing Board-approved base year.
- 2. Use a recent generation-based study to officially change our existing Board-approved base year to a new base year.

The shaded cells on these sheets are protected. If you have problems using these sheets, please contact your Office of Local Assistance representative by calling (916) 341-6199.

Section I: Jurisdiction Information and Certification			
<i>All respondents must complete this section.</i>			
I certify under penalty of perjury that the information in this document is true and correct to the best of my knowledge, and that I am authorized to make this certification on behalf of:			
Jurisdiction Name City of Lincoln		County Placer	
Authorized Signature 		Title Public Works Director/City Engineer	
Type/Print Name of Person Signing John E. Pedri, P.E.	Date	Phone () Include Area Code (916) 645-8576	
Person Completing This Form (please print or type) Larry T. Buckle, P.E.		Title Consultant	
Affiliation:	Consultant, IES		
Mailing Address	City	State	ZIP Code
8349 Dalkeith Way	Antelope	CA	95843
E-Mail Address <u>H2oBuckle@AOL.COM</u>			

Section II: Information for New Generation-Based Study for Existing or New Base Year
Attach additional sheets if necessary—reference each response to the appropriate cell number (e.g., "4").
Note: New base years must be representative of a jurisdiction's disposal and diversion.

1. Current Board-approved existing base year:	2. Proposed new generation-based study year:
1990	2002

3. Explain how the proposed generation study year is representative of average annual jurisdiction disposal and diversion:

Since 1990 the City of Lincoln has transformed from a small rural community with a strong agricultural base to a sizable bedroom community including a very large retirement component. It has been reported that The City of Lincoln is the fastest growing community in the State. With this demographic change the waste characteristics have also changed. This new base year study takes into consideration those changes.

All of the large business/industrial entities in the City have been contacted and their information is included in this study.

4. Enter diversion rate information below.

Diversion rate calculated using existing base year	a. 34 %	Diversion rate calculated using new generation-based study	b. 75 %
For existing base year pounds/person/day based on generation	7	For new generation based study pounds/person/day based on generation	17.8
Residential generation 69 %	Non-Residential generation 31 %	Residential generation 23% %	Non-Residential generation 77% %
Population existing generation-based study 7,248		Population new generation-based study 17,750	

5. If there is an increase from 4a to 4b, please explain how the new diversion rate is consistent with your current diversion implementation efforts. If the proposed new generation tonnage results in an increase in your pounds/person/day, please explain how this is consistent with your current diversion implementation efforts and provide any examples (e.g., change in jurisdiction's demographics).

There is a substantial increase from 4a to 4b; this is due to the changing demographics of the City of Lincoln. At this time and projected well into the future there will be a construction boom unprecedented in the area. Home construction is the largest industry in the area. The largest home builder has implemented a recycling program to avoid the high disposal costs at the local JPA landfill. The diversion of material from this industry has substantially impacted the Lincoln diversion numbers.

We do not anticipate a change in waste demographics for a number of years.

6. If the difference between the proposed diversion rates in 4a and 4b is greater than 5 percentage points, please explain the specific reasons for the difference. (For example: new/improved curbside diversion programs.)

There are three main areas of improvement/change:

- The construction industry has had to deal with the economics of reducing the volume of material they are disposing in the landfill. The city has forced this by flow control, debris haulers franchise agreements and high tip fees.
- The city has a much higher park, golf course, turf area ratio utilizing grass cycling.
- Other local industries have implemented corporate policies of maximizing recycling.

Also due to the change in population it has become more cost effective to recycle due to the volume of material in the area. There are a number of large recycling businesses that could not exist years ago due to volume, so the material was landfilled. That material is now being processed and returned to the local markets.

The local JPA/MRF has also increased productivity. This in combination with a new City green waste collection program and a City drop-off program.

7. Disposal Tonnage (enter values):	11721	2737	14458
	Residential	Non-Residential	Total

Please select the ONE choice below that best explains your disposal data and complete the required tables.

a. All tons claimed are from the Board's Disposal Reporting System (No explanation required. Go to Section 8.)

b. All tons claimed are from a 100 percent audit of hauler and self-haul tonnage. (Please complete Reporting Year Tonnage Request and Modification Certification sheet found at www.chwmb.ca.gov/LGCentral/Forms/rytnmdrq.doc)

c. Some Disposal Reporting System data were corrected. (Please complete Reporting Year Tonnage Modification Request and Certification sheet found at www.chwmb.ca.gov/LGCentral/Forms/rytnmdrq.doc)

8. In the table below, list the summarized diversion activities, and diversion data records that support your claim and are available for Board audit. **Note: The Board expects the jurisdictions to be able to provide all back-up documentation, if requested.** Include type of record and location—for example, weight tickets from transfer stations. This section should capture all diversion tonnage (form will perform all addition calculations). If any diversion is from restricted wastes, agricultural wastes, inert solids (e.g., concrete, asphalt, dirt,) white goods, and scrap metal, please identify those programs/waste types and fill out Section 10. Please mark as Attachment 8 all copies of survey forms.

*Please provide detailed Non-Residential waste information in Section 9.

Note: The Board has indicated that it will be scrutinizing total source reduction amounts greater than 5% of total generation. Please be prepared to provide additional details substantiating your claim.

Board Meeting
February 15-16, 2005

9. Specific Non-Residential Sector Waste Audits--Top 10 Non-Residential Generators

Please complete this table for the top 10 non-residential generators that were surveyed. List each non-residential generator separately from largest to smallest, based on total diversion tons. Audit reference number ties to your audit sheets.
 (Table will perform all addition calculations).

Type of Non-Residential Generator	Audit Reference Number	Specific/Major Diversion Activities Include Material Type (e.g., paper recycling, grasscycling) (List activities on one line)	Source Reduction Tons	Recycling Tons	Composting Tons	Total Diversion Tons	Percent of Total Generation (Total Diversion Tons/Total Generation in Section 8)	Survey Method Phone (P) Mail (M) On-site (O) Other
C&D	45	wood, cardboard, plastic		17160		17160	29.6%	On-site
C&D	23	asphalt, concrete		8000		8000	13.8%	On-site
JPA, MRF	34	cardboard, plastic, paper, metal		7129	859	7988	13.5%	On-site
Computer repair	13	cardboard, plastic, paper, metal	1304	1856		3160	5.5%	On-site
Cabinet construction	19	wood		1560		1560	2.7%	On-site
Golf Course	4	grass		1512		1512	2.6%	On-site
School	27	grass, newspaper		68	973	1041	1.8%	On-Site
Golf Course	2	grass			578	578	1.0%	On-site
Grocery Store	9	cardboard, produce, plastic		299	194	493	0.8%	Phone/mail
City Parks	29	grass			471	471	0.8%	On-site
Totals			1304	37583	9073	41960	72.4%	

Also provide an attachment 9 which includes all of the generators surveyed. Include for each generator (use type of generator in lieu of specific business name) diversion activity and material type and associated tonnage for each diversion activity/material type, and applicable conversion factors/sources. Include copies of survey form(s) used.

Summarize the non-residential diversion activities for the top 10 generators quantification methodology, and applicable conversion factors and sources (e.g., cardboard recycling: quantified by monthly tonnage receipts provided by the contact person at the business).

C&D tonnages resulted from weight slip of the processor. Also the JPA, MRF has weights for everything that enters or exits the MRF. The computer repair also has weight slips for all of its activities.

The cabinet construction company has records for boxes of material removed but not the weight. An average weight was estimated on the material type.

All composted/grass cycling material was estimated using the standard 7.6 tons per acre. Acreages were determined using maps and other means. Other composted material weights were the result of weight slips.

The Grocery store has weight slip for all the material it generates.

10. For each restricted waste type (i.e., agricultural waste, inert solids, [e.g. concrete, asphalt, dirt, etc.] scrap metals and white goods [PRC section 41781.2]) and associated program, please provide the following information:

a. If the diversion program started on or after January 1, 1990, complete the following table.

Note: program name refers to one specific diversion program for that waste type (e.g., "Diversion conducted by city public waste dept.").

Restricted Waste Type	Specific Program Name	Year Started	Tonnage
Inert Solids ▼	Two Rivers Demolition	2001	13332
Inert Solids ▼	Roseville Aggregates Inc.	1994	8000
Inert Solids ▼	Western Placer Waste Management Authority	1996	3268
White Goods ▼	Western Placer Waste Management Authority	1996	18
Scrap Metal ▼	Western Placer Waste Management Authority	1996	75
Pull Down for Waste Types ▼			

b. If the diversion program started before January 1, 1990 - and if documentation on the program and waste type has not been approved by the Board - on a separate sheet marked "Attachment 10b", provide the documentation that indicates:

- How the diversion was the result of a local action taken by the jurisdiction, which specifically resulted in the diversion (PRC sec. 41781.2 [c] [1]).
- That the amount of that waste type diverted from the jurisdiction in 1990 was less than or equal to the amount of that waste type disposed at a permitted disposal facility by the jurisdiction in any year before 1990. (**Note:** this criterion is applicable to the entire jurisdiction, not to individual programs (PRC sec. 41781.2 [c] [2])). Please include documentation.
- That the jurisdiction is implementing, and will continue to implement, the diversion programs in its source reduction and recycling element.

Note: If documentation for a waste type and program has already been approved by the Board, you do not have to provide an attachment 10b for that waste type and program.

Instead please provide date of Board approval of previously submitted information. _____ (Date)

If documentation is not available, go to 10d.

c. If the diversion program started before January 1, 1990, and the documentation requested in 10b is available (but not yet approved by the Board), complete the table below for each program claimed:

Restricted Waste Type	Specific Program Name	New Base Year or Reporting Year Diversion Tonnage
Pull Down for Waste Types ▼		
Pull Down for Waste Types ▼		
Pull Down for Waste Types ▼		
Pull Down for Waste Types ▼		
Pull Down for Waste Types ▼		
Pull Down for Waste Types ▼		

d. If the diversion program started before January 1, 1990, and the documentation requested in 10b is not available, please complete the table below for each program claimed. **Note:** Only the difference between the new base year/reporting year and 1990 can be counted in the diversion rate calculation.
