

Hi Brian,

My name is Matt, I'm the founder of the Green Box electronic waste collection program in Orange County. I have a couple of inquiries regarding Thursdays Cal-Recycle Grant workshop that I'm hoping you can answer.

To provide a little background info: The Green Box collection program is a successful and predictable system of collecting electronic waste in local California communities. Our expanding infrastructure of e-waste collection kiosks facilitate CA consumer/recycler accessibility while reducing and avoiding significant greenhouse gas emissions. We feel that the Green Box solution is a good fit for grant consideration, but I am unsure if the workshop on Thursday would be the proper forum for the discussion/proposal. It is after all, focused of fibers, plastic and glass.

I'm considering making the trip from here in Santa Ana to attend the workshop. Please let me know if you think the time to attend and participate would be well spent for us. Also, if you are aware of any Grant or other program we may apply for or find useful please forward the info my way.

Absolute Best,

Matt
