

(1) I have missed the activities regarding the “Stakeholder Workshops” and “Criteria Development” in reference to the grant programs for:

- a) Fiber, Plastic and Glass program and
- b) GHG reductions.

Is there any information on these so I can catch up and prepare for the RFA Presentation in March?

(2) QUESTION

We qualify for the propose grant in the area of Fiber-Glass and GHG. We have a technology currently going through the patenting process. Our concern is “non-disclosure” in order to preserve patent rights. Therefore, we need to know about non-disclosure agreements and what parts of the information supplied is made public. Could you please abound on this?

REQUEST

Is there a way to obtain relevant examples of past grant or loan participants to follow as a template? We are particularly interested in the Vetrazzo (glass recycled product) case... their template will be useful as a guide in our particular case.

Sincerely

Ricardo Villasenor
