Subject: Ron Dempsey 5 Plastic recycling

Hello represent a not for profit serving 500 adults with intellectual disabilities. We have been recycling PET bottles, plastic film, EPS, etc.
will expandable polystyrene EPS be considered for this program?
Ron Dempsey

Do you consider adults with intellectual disabilities as a community?
Regards, Ron

Please read the full message about polystyrene. EPS takes up space in land fills so tons are low but space is high due to the gas injected into to polystyrene foam. We would use a compression system to maximize transportation to a reuse application.

Ron Dempsey Ability Counts

I understand the payback for loans is within 10 years
What is the interest-rate?
