Howard:

Ten of my clients are now a "Net-Zero" GHG operations as defined by the new CARB/Calrecycle term that popped up on June 13 at CARB having gone through The Climate Registry verified GHG Inventory process coupled with the WARM model for GHG avoidance from recycling

CARB/Calrecycle has "Net Zero" waste facilities by 2035.....The 10 companies I represent below are Net-Zero today.

Net-Zero Now.....no reason to wait for 2035.....

Evan

Client	Registry	Emission Years Verified
Agromin	CCAR/TCR	2006-2010
California Waste Recovery Systems	TCR	2010-2011
GreenWaste Recovery	TCR	2008-2011
