**Grifols Inc., and its US subsidiaries
Compliance with California Public Resources Code Sections 47115-47116**

California law requires pharmaceutical manufacturers to submit each year a plan to CalRecycle that describes how a manufacturer supports the safe collection and disposal of sharps waste of medication they sell or distribute in California that is usually intended to be self-injected at home.

Grifols Inc., and its US subsidiaries, (Grifols) products that are intended for use in the home are distributed by licensed specialty pharmacies, homecare companies or hospital providers. Each of these entities has its own procedures for safe collection and disposal of sharps, and is obligated to Grifols to perform these services in connection with distribution of Grifols' products. These entities provide for the sharps collection and disposal as part of their patient care.

In addition, all of Grifols' product prescribing information includes language that advises the patient to dispose of any used administration equipment and unused product into an appropriate safety container. These safety containers are provided by the distributor of the product to the patient – the specialty pharmacy, home care company, or hospital. We routinely work with our specialty pharmacies and home care companies to ensure that they continue to have proper sharps disposal procedures in place.

In summary, Grifols supports the safe collection and disposal of sharps and has relied on the outstanding practices of our distribution partners at the specialty pharmacies, home healthcare companies and hospital providers to ensure the proper disposal is accomplished.
