Sacramento, Ca. 95812-4025

Subject: Enforcement Advisory Council Resolution 2009-01.
Enforcement Advisory Council – California Integrated Waste
Management Board Review and Circulation of Guidance Documents.

Dear Mr. Rauh:

The Enforcement Advisory Council (EAC) met on March 12, 2009 and continued discussions on the subject of furthering the effectiveness of our communication with you in the review, circulation, and approval of guidance documents for LEAs and interested parties. We recognize there are times when guidance is required and an expedited review is necessary. The EAC would like to work with you to develop criteria for mutually acceptable turn-around times.

An example that was discussed was the review process for guidance regarding the landfill gas monitoring plan regulations. The time provided for EAC input was very short and did not allow sufficient time for complete analysis. The guidance included an interpretation of the regulations and proposed gap measures directing LEA and California Integrated Waste Management Board (CIWMB) staff to implement the requirements in a statewide consistent manner. Additional time to review the guidance would have allowed EAC members to receive feedback from the LEA jurisdictions within their respective Roundtable regions. The feedback would have allowed a more in-depth review and complete set of recommendations for CIWMB staff to use in the analysis and final guidance.

An example of a situation that is allowing for complete review and input is the guidance documents currently under review for Minor Violation and AB 2679. Although not complete, the EAC and LEAs (as part of the last set of LEA Roundtable meetings) have been able to fully discuss the interpretation of the Statute and a process for documenting minor violations as part of the inspection process. Thank you for the opportunity to be involved in the process, we hope to provide your staff with a complete set of

recommendations on the draft guidance and provide input over the next several months as the guidance is implemented.

The EAC is to advise and assist the Board, CCDEH-Solid Waste Policy Committee, and LEAs in responding to requests including, in part, technical, permit, enforcement, and inspection issues and vice-versa. In many cases, guidance includes the interpretation of regulations that is valuable to the LEAs. Equally important for effective guidance, is to allow sufficient time to review and make certain all information is accurate, applicable, and appropriate for all interested parties. We look forward to working with you now and in the future in all aspects of guidance development that will continue to support the most effective permitting, inspection and enforcement programs.

Should you have any questions, please contact me at (858) 694-2232.

Sincerely,

Rebecca Lafreniere, Chair
Enforcement Advisory Council
