Keys to Increased Use

- Cost
- Specs
- Training

Key: Reduce Cost

Cost

Key: Reduce Cost

Historic Weighted Average:

$300/cy

Key: Reduce Cost

High Price Due To:

- Material Type
  - Bagged Compost (vs. Bulk)

Key: Reduce Cost

High Price Due To:

- Application Method
  - Hydroseed (vs. Blower Truck)

Key: Reduce Cost

- Specs Revised to Allow Bulk (As Well as Bagged) Materials

2. Compost may be dry applied at the total of the rates specified in the preceding table and the following table instead of including it as part of the hydro-seeding operations. In areas where the compost is dry applied, all compost for that area must be applied before the next operation.

Key: Reduce Cost

- New Specifications:
  - Erosion Control (Compost Blanket)
  - Compost (Incorporate)

Key: Reduce Cost

New Cost:

$60/cy

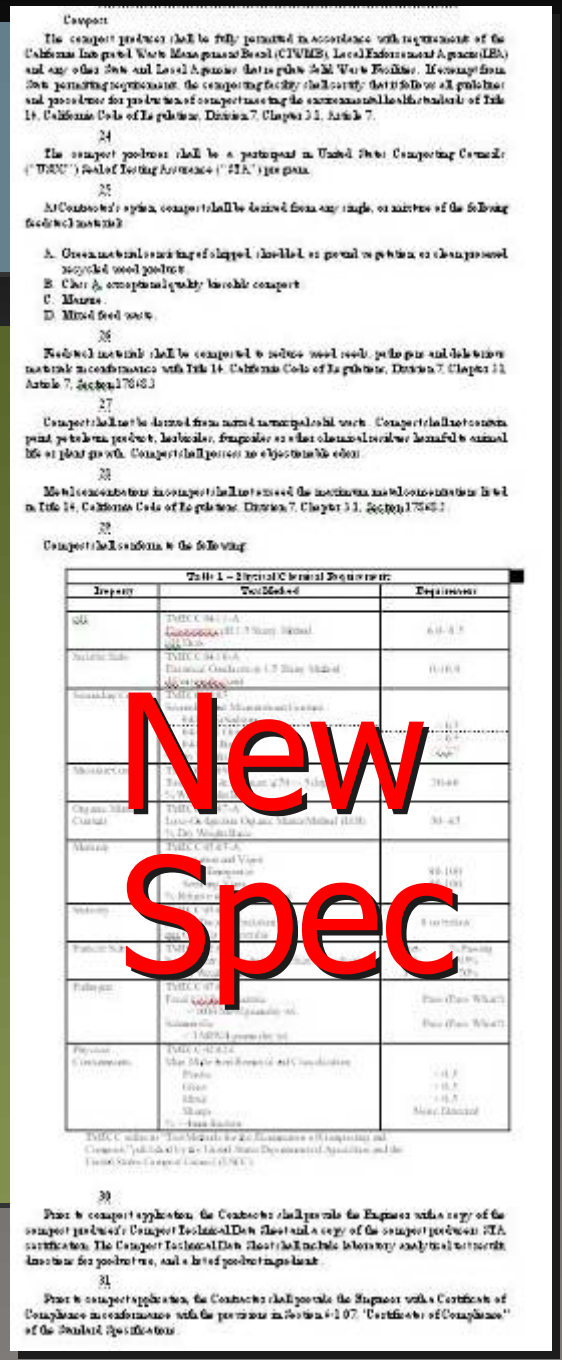
CALTRANS DRAFT COMPOST SPEC. (1/2/97)

"COMPOST: - Compost shall be derived from green material consisting of chipped, shredded, or ground vegetation or clean processed recycled wood products, or a Class A exceptional quality biosolids compost, as required by US EPA, 40 CFR, part 503c regulations, or a combination of green waste and biosolids compost. The compost shall be processed or completed to reduce weed seeds, pathogens, and deleterious material and shall not contain paint, petr[illegible]ducts, herbicides, fun[illegible]or other chemical residues that would be harmful t[illegible]plant o[illegible]. [illegible]ther de[illegible]arious [illegible]ch as plastic, glass, metal or rocks, sha[illegible]not ex[illegible]ercen[illegible]by weight or [illegible]. A [illegible]mum i[illegible]rnal temperature of 135 degree[illegible]be ma[illegible]d for at[illegible]ous[illegible]e composting process. The compost shall be thoroughly turned a minimum of five times during the composting process,and shall go through a minimum 90 days curing period after the 15 day thermophilic compost process has been completed. Compost shall be screened through a minimum of 3/8 inch screen.

The moisture content of the compost shall not exceed 25%. Moisture content shall be defined by California Test 226. Compost Products with a higher moisture content may be used provided the weight of the compost is increased to equal compost with a maximum moisture content of 25%

Compost shall be tested for maturity/stability with a Solvita Test Kit supplied by the compost producer. The compost shall measure a minimum of 7 on the maturity/stability scale."

Old Spec



Compost

The compost producer shall be fully permitted in accordance with requirements of the California Integrated Waste Management Board (CIWMB), Local Enforcement Agencies (LEA) and any other State and Local Agencies that regulate Solid Waste Facilities. If exempt from State permitting requirements, the composting facility shall certify that it follows all guidelines and procedures for production of compost meeting the environmental health standards of Title 14, California Code of Regulations, Division 7, Chapter 3.1, Article 7.

24

The compost producer shall be a participant in United States Composting Council's ("USCC") Seal of Testing Assurance ("STA") program.

25

All Contractor's option, compost shall be derived from any single, or mixture of the following feedstock materials:

A. Green material consisting of chipped, shredded, or ground vegetation or clean processed recycled wood products.
B. Class A, exceptional quality biosolids compost.
C. Manure.
D. Mixed food waste.

26

Feedstock materials shall be composted to reduce weed seeds, pathogens and deleterious materials in conformance with Title 14, California Code of Regulations, Division 7, Chapter 3.1, Article 7, Section 17868.3.

27

Compost shall not be derived from mixed municipal solid waste. Compost shall not contain paint, petroleum products, herbicides, fungicides or other chemical residues harmful to animal life or plant growth. Compost shall possess no objectionable odors.

28

Metal concentrations in compost shall not exceed the maximum metal concentrations listed in Title 14, California Code of Regulations, Division 7, Chapter 3.1, Section 17868.3.

29

Compost shall conform to the following:

Table 1 – Physical Chemical Requirements

Property	Test Method	Requirement
pH	TMECC 04.11-A, Electrometric Method	6.0 - 8.5
Soluble Salts	TMECC 04.10-A, Electrical Conductivity 1:5 Slurry Method	0 - 10.0
Moisture Content	TMECC 03.09-A, Total Solids Oven Dried at 70°C	30 - 60
Organic Matter Content	TMECC 05.07-A, Loss-On-Ignition Organic Matter Method (LOI)	30 - 65
Maturity	TMECC 05.05-A, Germination and Vigor, Germination	80 - 100
	TMECC 05.05-A, Germination and Vigor, Vigor	80 - 100
Stability	TMECC 05.08-B, Carbon Dioxide Evolution Rate	8 mg CO2-C per g OM per day
Particle Size	TMECC 02.02-B, Sample Sieving for Aggregate Size Classification	Pass 3" Screen, Minimum 70% to 100% Pass 1" Screen
Pathogens	TMECC 07.01-B, Fecal Coliform	Pass (Pass When Less Than 1000 MPN per gram dry wt.)
	TMECC 07.02-B, Salmonella	Pass (Pass When Less Than 3 MPN per 4 grams dry wt.)
Physical Contaminants	TMECC 02.02-B, Sample Sieving for Aggregate Size Classification, Man-Made Inert Removal and Classification	
	Plastics	< 0.5 %
	Glass	< 0.5 %
	Metal	< 0.5 %
	Sharps	None Detected

TMECC refers to "Test Methods for the Examination of Composting and Compost," published by the United States Department of Agriculture and the United States Composting Council (USCC).

30

Prior to compost application, the Contractor shall provide the Engineer with a copy of the compost producer's Compost Technical Data Sheet and a copy of the compost producer's STA certification. The Compost Technical Data Sheet shall include laboratory analytical test results, directions for product use, and a list of product ingredients.

31

Prior to compost application, the Contractor shall provide the Engineer with a Certificate of Compliance in conformance with the provisions in Section 6-1.07, "Certificates of Compliance," of the Standard Specifications.

New Spec

Standard Language

Compost Shall Comply With the Following…

Producer Requirements

Compost Producer Shall be Fully Permitted Per:

- California Integrated Waste Management Board
- Local Enforcement Agencies
- Any Other State and Local Agencies That Regulate Solid Waste Facilities

Feedstocks

- Green Material
  - Chipped, Shredded, or Ground Vegetation
  - Clean, Processed, Recycled Wood Products
- Biosolids
- Manure
- Mixed Food Waste

Materials

- Shall be Composted to Reduce Weed Seed and Pathogens in Conformance with CA. Title 14, CCR, Div. 7, Ch. 3.1, Art. 7, Sec. 17868.3
  - Similar To US EPA Regulation 40 CFR, Part 503b

Standard Test Methods

USCC Seal of Testing Assurance (STA) Program:

- Regular Testing of Compost
- Standard Testing Methodologies
- Certified Labs

Quality Control

Old Spec Tests For:

- Maturity

Quality Control

New Spec Tests For:

- Maturity
- pH
- Soluble Salts
- Stability
- Pathogens
- Stability
- Phytotoxicity
- Particle Size
- Physical Contaminants
- Heavy Metals
