Environmental Justice

Public entities that receive grant funding from CIWMB for this grant program must comply with the following principles of Environmental Justice. Environmental Justice is defined in Government Code Section 65040.12(e) as: "...the fair treatment of people of all races, cultures, and incomes with respect to the development, adoption, implementation and enforcement of environmental laws, regulations, and policies." Senate Bill 115 (Solis, Statutes 1999, Chapter 690) broadly requires all California Environmental Protection Agency boards, departments, and offices to conduct their "programs, policies, and activities that substantially affect human health or the environment in a manner that ensures the fair treatment of people of all races, cultures, and income levels, including minority populations and low-income populations of the state."

Sample # 1 Purchasing Policy (Sample only. Do not submit.)

PURCHASING POLICY

Purpose

The (entity/jurisdiction) provides that all departments shall, whenever possible, use recycled products and recycled materials to meet their needs. This policy is enacted to demonstrate compliance with the Waste Management Reduction Act and foster market development for recycled products.

Definitions

Recycled Material - Waste material and by-products that have been recovered or diverted from the solid waste stream and that can be utilized in place of raw or virgin material in the production of a product. Recycled materials may consist of material derived from post-consumer waste, manufacturing waste, industrial scrap, agricultural waste, and other items, all of which can be used in the manufacture of new products.

Post-Consumer Recycled Materials - A finished material or product that has served its intended use and would normally be disposed of as solid waste. Examples of post-consumer recovered materials include, but are not limited to, old newspaper, office paper, yard waste, steel, glass, aluminum cans, plastic bottles, oil, asphalt, concrete, and tires.

Practicable - Sufficient in performance and available at a reasonable price within a reasonable time period.

Pre-Consumer - Materials or by-products generated after manufacturing of a product is completed, but before the product reaches the end-use consumer. Examples of pre-consumer recovered materials include, but are not limited to; obsolete inventories of finished goods, rejected unused stock and paper wastes generated during printing, cutting, and other converting operations.

General Policies

- A. All (entity/jurisdiction) departments shall use recycled products whenever practicable. Special emphasis shall be placed on the purchase of products manufactured with post-consumer recycled materials.
- B. All (entity/jurisdiction) departments may, at their option and with purchasing concurrence, require procurement of designated recycled products or recycled products above the levels required by this policy.
- C. The (entity/ jurisdiction) shall require its contractors and consultants to use and specify recycled products in fulfilling contractual obligations whenever practicable.

- D. The (entity/ jurisdiction) shall promote the use of recycled products publicizing its procurement policy whenever practicable.

Responsibilities of Recycled Products and Materials Coordinator

The (title) shall coordinate the implementation of this policy. He/she will establish a list of recycled products that shall be purchased by all (entity/ jurisdiction) departments whenever practicable and will develop the mechanism for maintenance, additions, and deletions to the list of recycled products available for procurement. Maintenance of the list will include addition of new products containing recycled material as they become available and make available to departments specifications on the new product along with a list of suggested uses. The (title) will also work with all departments to establish minimum recycled content standards for designated recycled products to maximize recycled product availability, recycled content, and competition. The (title) will also be responsible for annual policy review.

Sample #2 Purchasing Policy (Sample only. Do not submit.)

WASTE REDUCTION AND RECYCLING

(The entity/ jurisdiction) will act to make resource conservation an integral part of its waste reduction and recycling programs. The practice of discarding materials used in the (entity/ jurisdiction) facilities is wasteful of natural resources, energy, and money.

It will be the policy of (entity/ jurisdiction) to implement the following actions:

1. The (entity/ jurisdiction) will integrate the concept of resource conservation, including waste reduction and recycling, into its environmental programs.
2. The (entity/ jurisdiction) will decrease the amount of waste of consumable materials by: a) reduction of the consumption of consumable materials wherever possible; b) full utilization of all materials prior to disposal; and c) minimization of the use of non-biodegradable products wherever possible.
3. The (entity/ jurisdiction) will cooperate with, and participate in, recycling efforts being made by the city and county. As systems for the recovering of waste and recycling are developed within the (entity/jurisdiction), they will participate by appropriately separating and allowing recovery of recyclable waste products.
4. The (entity/jurisdiction) will purchase, where financially viable, recycled products. The (entity/jurisdiction) will also encourage suppliers, both private and public, to make recyclable products and unbleached paper products available for purchase.
5. Representatives of the (entity/jurisdiction) will actively advocate, where appropriate, for resource conservation practices to be adopted at the local, regional, and national levels.
