

30 second Animated Used Oil PSA. Produced by Ross-Campbell, Inc.

Narrator:

If you change your own motor oil, remember this. Improperly disposing of your used oil and filter can cause irreparable harm. Just one gallon of used oil can pollute one million gallons of water, so, just put your oil in a clean container with a tight fitting lid, and put your used filter in a Ziploc® bag, then take your oil for one last ride to an auto parts store or QuickLube® or many communities have curbside recycling. Visit “[RecycleUsedOil.com](http://RecycleUsedOil.com)” for more information. This video was produced by Ross-Campbell, Inc.
