The objective of this study is to provide a guidance document that landfill operators and regulators can use to evaluate potential changes to landfills that will result in additional GHG emissions. The study will be based on an evaluation of existing state-of-the-art practices, as reflected in published literature, reports to regulatory agencies, and contractor familiarity with specific landfill practices and projects. It will evaluate the technologies and practices and recommend practical and cost-effective site-specific measures that can be used on a voluntary basis to reduce GHG emissions from landfills in California.

The CIWMB reserves the right to amend the budget for this Agreement as needs arise.

Payment Withhold The provisions for payment under this contract will be subject to a ten percent (10%) withholding per task.

The withheld payment amount will be included in the final payment to the contractor and will only be released when all required work has been completed to the satisfaction of the CIWMB.

EXAMPLE

Numbers to be used in determining cost points

Lowest cost proposal = \$10

Other cost proposal = \$12

30 cost points available

EVALUATION AND SELECTION CONT.

factor (referenced above) = \$10 ÷ \$12 = .83
Cost Points Calculation for Other cost proposal
.83 X 30 cost points = 25 cost points

Final Cost Points Awarded
Lowest cost proposal receives 30 cost points
Other cost proposal receives 25 cost points
