Our earlier administrators, occupied with the building up of an Empire, probably never thought of the important part that forests have always played, play now, and will for ever play in the household of nature, or of the immense influence they exercise on the physical well-being of a country.

—Berthold Ribbentrop, Inspector General of Forests in India

VA #11 Comparing Conservation: India and California

British India

Contemporary California

Similarities:

VA #12 Conservation Efforts in British India—Closing

Although not everyone recognized the value of conservation at the beginning of the 20th century, Ribbentrop's writings indicate that people were starting to question the relationship between humans, the environment, and the sustainability of our economies and cultures.

What do you think accounts for the differences in efforts to conserve natural resources in British India and contemporary California?

Why is it important that the government create laws and policies to encourage conservation?
