

Accessibility Products

Tire-derived accessibility products provide safe, cost effective, beneficial properties to the manufactured and installed ADA compliant accessible routes at playgrounds and sport court, building and residential transition and entry level landing, ramps, walking, running surfaces and more.

Accessibility Benefits May Include:

- Accessibility for mobility devices
- Enhanced comfort when walking and running
- Reduced liability from slipping, falling and tripping in wet or dry conditions
- Product durability and performance in all climates
- Easy maintenance and installation
- Resistance to cracking, breaking and chipping
- Reduced storm water run-off depending on product
- Preserves urban trees as flexibility of product allows for tree root growth

Accessibility Applications May Include:

- Sport edge reducers
- Transition ramps
- Ramp end landings
- Accessible routes
- Sidewalks
- Walking and running surfaces
