

Ballistic Products

Tire-derived ballistic products include ballistic backstops and tiles, and padding used in hand-to-hand combat pits for training exercises. These products offer improved safety and performance over their conventional alternatives.

Ballistic Product Benefits May Include:

- Reduced injuries due to impact absorption
- Easy to install and maintain
- Excellent bullet capture reducing ricochets and reducing airborne lead dust
- Reduced noise levels
- Durable and long-lasting

Ballistic Product Applications May Include:

- Ballistic rubber backstops and tiles
- Rifle, pistol and ballistic ranges
- Live fire tactical training facilities
- Hand-to-hand combat training pits
