Tri-C Tire Recycling Division

Tri-C Ballistic Rubber

Tri-C Ballistic Rubber is a remarkable rubber backstop ideal for Rifle, Pistol, and Ballistic Ranges. **Tri-C Ballistic Rubber** is designed to encapsulate fired ammunition, reduce noise attenuation, and cut down on bullet ricochet. Made from 100% California scrap tires, **Tri-C Ballistic Rubber** is a non-decomposable product that controls air-borne lead dust and reduces water runoff while being environmentally friendly. **Tri-C Ballistic Rubber** is a safe containment system that is a reliable and effective alternative to the conventional metal sheets.

Benefits

- Long Lasting
- High Durability
- Reduces Bullet Ricochet
- Promotes Gun Range Safety
- Lessens Noise Attenuation
- Accommodates rifle and pistol calibers
- Safest range system

Optimize

- Rifles, pistols and shotguns can be use shot right up to the backstop surface
- Shooting range containment system
- Minimizes environmental hazards
- Use 3/4" rubber truck tire nuggets wire free
- Will contribute to LEED credits for materials and resources LEED NC Credits MR 5.1 and MR 5.2 (1-2 points) contribute to obtaining LEED credits
- Rifle and pistol bullet trap and range backstops

Applications

- Rifle, Pistol, and Ballistic Ranges
- Live Fire Tactical Training Facilities
- Ballistic Baffles

Sizes

- 3/4" truck tire rubber nuggets

Colors

- Black
