

# Cleaning Tools

Preserve our environment for future generation by using tire-derived products molded from old scrap tires and recycled plastic. The collection of professional and home care cleaning tools manufactured in California are made from 100% post-consumer recycled tires and plastic. The products are environmentally friendly, save energy, minimize greenhouse gases during manufacturing and eliminate tires and plastics from being added to the landfills. By using these tire-derived product you are helping preserve our environment for future generations. See the "Cleaning Tool Collection" Video.

## **Cleaning Tools Benefits May Include:**

- Innovator
- Sustainable solution
