

Flooring

Recycled tires are progressively finding their way into a variety of products, from a range of flooring products to anti-fatigue mats. These products are proving to be more and more competitive with their traditional counterparts as their potential benefits extend beyond cost effectiveness into enhanced performance and durability.

Product benefits may include:

- Durability and wear-ability
- Low installation and maintenance costs
- Enhanced comfort and reduced the stress on joints and bones
- Reduces fatigue and improves employee productivity
- Reduced injuries from falling due to shock absorption
- Non-skid surface and slip resistance in both wet and dry conditions
- Insulates sound
