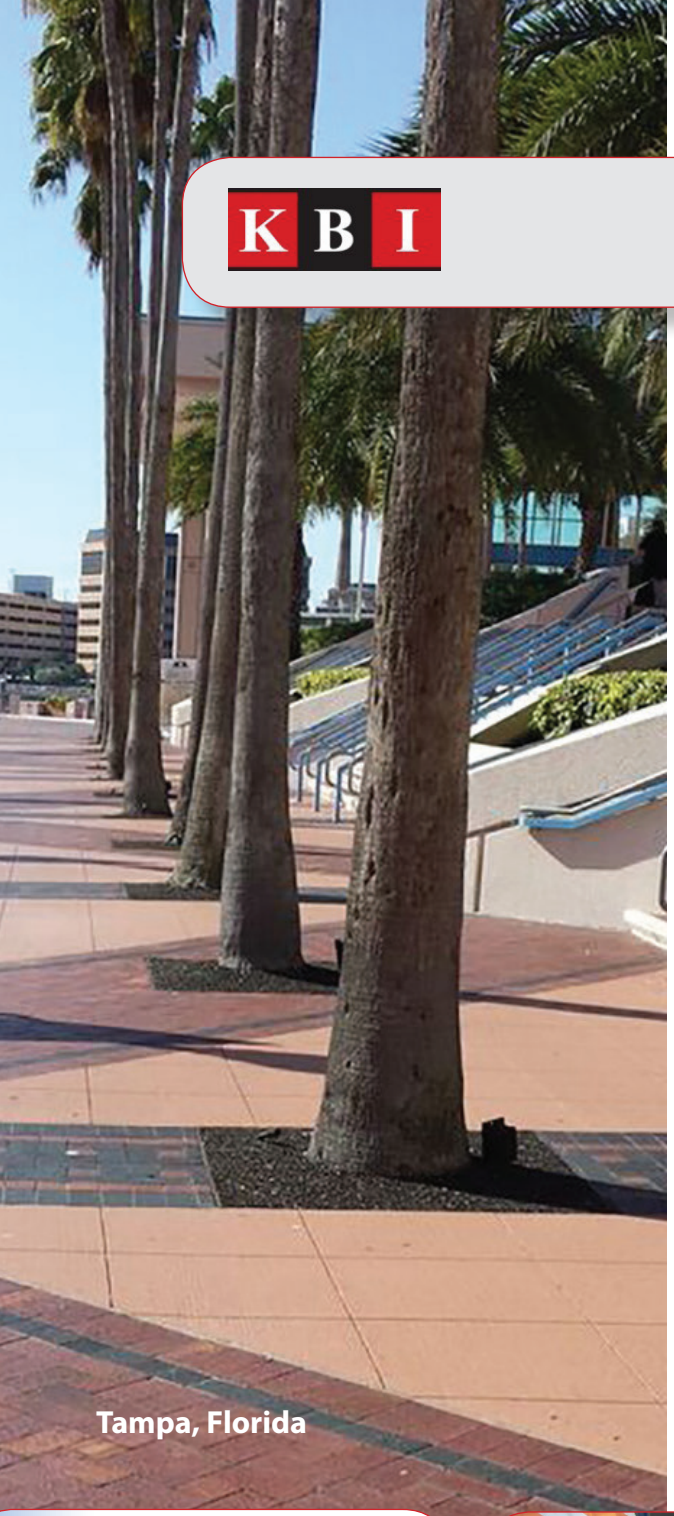
Smarter Materials for Next Generation Infrastructure™

FLEXI®-Tree Surrounds



Tampa, Florida

KBI Flexi®-Tree Surrounds porous, flexible and non-cracking material is the answer to meeting city and neighborhood urban infrastructure elements. The porous material encourages downward growth of tree roots enhancing overall tree health and reducing tree replacement costs unlike tree grates, concrete and bricks. KBI Flexi®-Tree Surrounds have been installed in cities world-wide providing a safety surface strong enough to protect both trees and pedestrians while providing the optimal method for water and nutrient infiltration.

KBI Flexi®-Tree Surrounds benefits

- **Porous** – provides oxygen, nutrients and water to trees
- **Flexible** – prevents root lifting and cracking
- **Durable** – low-impact, maintenance free construction
- **Aesthetic** – enhances property appearance

KBI Flexi®-Tree Surrounds value

- Flexes through freeze/thaw cycles and summer heat
- Eliminates debris removal required with steel grates
- Reduces liability and maintenance costs
- Contributes to LEED points and ADA design compliant projects
