

# Landscape Surfaces

Tire-derived landscape products including landscape mulch, tree well systems, walkways and pavers deliver aesthetically pleasing and numerous beneficial uses. Rubber landscape mulch is known to last years longer than wood mulch, providing a cost effective solution that reduces the need to replenish the mulch over time.

## **Landscape Surface Benefits May Include:**

- Durable and resilient to various climates and exposure to elements
- Variety of choices for cost, use, maintenance and durability
- Prevents erosion and water runoff assuring shrub beds remain healthy
- Low installation and maintenance costs
- Minimizes dust and mud
- Will not deteriorate, float or blow away
- Resists fading and compaction
- Water permeable preventing fungus and bacterial growth
- Non-toxic, environmentally-friendly material
- Reduces weed growth
- LEED point contribution

## **Landscape Surface Applications May Include:**

- Residential Areas
- Commercial Landscapes
- Municipal Parks and Recreation
- Golf Courses
- Walkway and Paths
- Schools and Universities
- City, State and Federal Parks
