Smarter Materials for Next Generation Infrastructure™

FLEXI®-Pothole

KBI Flexi®-Pothole is a specialty product designed for municipal agencies and commercial enterprises with ongoing road maintenance needs. KBI Flexi®-Pothole, a premium blend of wire-free recycled tire granules, rock aggregate and proprietary binding agent, outperforms and outlasts other patching applications. KBI's pothole system controls further deterioration and reduces expensive repairs. This long-lasting solution minimizes the recurrence of craters that drain state and local roadway repair budgets and reduces safety concerns and damage liability risks.

KBI Flexi®-Pothole benefits

- **Mobililty** – Mix pothole material on site for small and large scale installations
- **Quick-setting** – installation provides for effective and less disruptive application
- **Flexible** – patch maintains integrity through freeze/thaw cycles and summer heat

KBI Flexi®-Pothole value

- Reduces vehicle damage repairs due to roadway ruts and potholes
- Improves performance outcomes
- Reuse the very tires that caused the problem
- Helps meet requirements of sustainability initiatives and programs
