

KID KRETE

Poured-in-Place Safety Surfacing

Kids play hard, Kid Krete keeps play safe

Realize your creatively-inspired playground design with virtually any shape or color embedded in your seamless playground surface – all while keeping children safe and protected from falls. IPEMA-certified up to 10' fall heights, our poured-in-place surfacing is a clean and safe alternative to sand, wood, grass, gravel, and playground rubber mulch. With many color choices and custom blends, it's easy to create an attractive design that will last for years to come.

Features and Product Highlights

- **Skid resistant** – wet and dry
- **Water permeable** for better drainage and fast drying
- **Easy to maintain** – no more refilling with loose materials
- **Non toxic and certified 100% steel free**
- **Eco-friendly** – molded from 80% post-consumer waste tires diverting as many as 2.5 tires per 4 square feet from our landfills
- **IPEMA Certified to ASTM F1292** for head impact attenuation up to fall heights of 10 feet.
- **ADA compliant and meets ASTM and SPSC requirements**
