

PD PLAY PAD

(760) 597-5990

You already know that we're the only commercial playground manufacturer in California using 100% recycled plastic materials, but did you know that we also have an entire safety surfacing division?

PDPlay Pad Rubberized Surfacing is an ideal surface when it comes to selecting a playground surface that is safe, durable, attractive, maintenance free and environmentally friendly. Poured-in-Place Rubberized Surfacing allows a seamless integration of different color schemes and patterns within the play surface and allows for irregular site configurations.
