

## SplashMax<sup>®</sup>

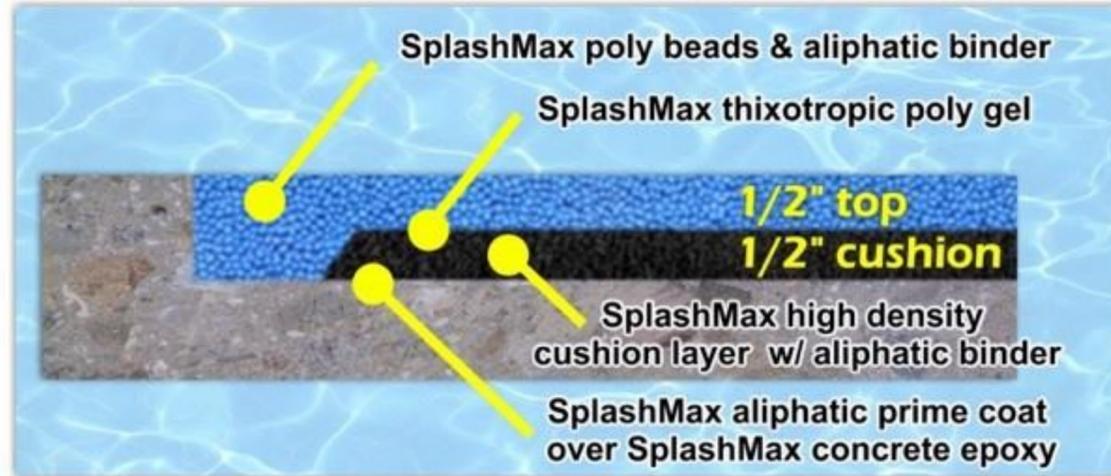

### POLY BEAD SPLASH PAD SURFACING

**SplashMax<sup>®</sup>** is our safe and fun splash pad surfacing. PlayMax has partnered with industry leader **PolySoft** to provide **SplashMax<sup>®</sup>** water play surfacing. Featuring high-quality polyolefin beads and crystal-clear aliphatic binder and our exclusive high-density rubber cushion layer, **SplashMax<sup>®</sup>** is designed to create a safe and fun water play experience for all.

The best thing about **SplashMax<sup>®</sup>** is the poly beads that create a much cooler surface than traditional rubber granules. This makes **SplashMax<sup>®</sup>** the natural choice for splash pads exposed to bare children's feet.

**SplashMax<sup>®</sup>** beads are sun resistant too – making colors vibrant for a longer time than ordinary splash pads.

With an industry leading 1/2" thick wearing surface for high durability, **SplashMax<sup>®</sup>** is America's quality leader, with a top layer that's 33% thicker than most pads.

IT'S THE COOLEST THING AROUND!
