Saddle Brown

Sierra Rubber Play is an innovative replacement for traditional loose-fill materials such as wood chips, sand or gravel and looks great year round. Made from 100% California recycled tires, the play surface is environmentally friendly and provides a safe play surface for children. Sierra Rubber Play is the natural choice due to its soft spring like quality when installed in a fairly thick layer adding extra safety for children if they fall off of the playground equipment. When properly installed Sierra Rubber Play provides critical fall height protection of 14' with a nine inch depth and 12' with a six inch depth as per ASTM F1292-09 and ASTM F1951-99.

Applications

- Parks and recreation
- School playgrounds
- Pathways
- Residential
- Day care centers
- Churches

Benefits

- Pliable resilient surface
- Shock absorbent reducing injuries
- Meets standards set by the U.S. CPSC
- Inhibits growth of molds and fungi, reducing allergy risk
- Affordable and cost effective
- Low maintenance
- Water permeable
- Seven-year color warranty
