GroundRubber Solutions™ by West Coast Rubber Recycling

GroundRubber Hand-to-Hand Combat Mix

Our GroundRubber Nuggets are a perfect material for hand-to-hand combat pits. Government agencies and military training units are using our rubber nugget product as a safe alternative for padding during combat training as opposed to the traditional harden sand pits. GroundRubber nugget mix is a stable, yet flexible surface capable of withstanding the rigors of combat drills. The specially designed rubber nugget mix forms a resilient, impact absorbing and soft landing pad that helps prevent fatigue and injury during training exercises. GroundRubber hand-to-hand combat mix has excellent drainage and eliminates dust and bare spots assuring year round use of the combat pits.

Benefits

- Impact absorbing
- Excellent drainage
- Resilient
- Reduces injuries
- Easy to install
- Low maintenance
- Long lasting
- Reduces dust
- Made from 1005 California scrap tires

Colors

- Black

Sizes

- 3/8" to 1"
