TD5275 shown at left utilizes our 30 lb base.

Yield To Pedestrian sign and all other signs mounted on the TD5275 Boomerang Reboundable Base System will have the bottom edge of the sign a minimum of 12 inches above the roadway.

The R1-6 Yield To Pedestrians and the R1-6A Stop For Pedestrians signs measure 12" X 36" and are made from ASTM 4956 compliant materials. The top edge of these signs will be 48" above the roadway surface.

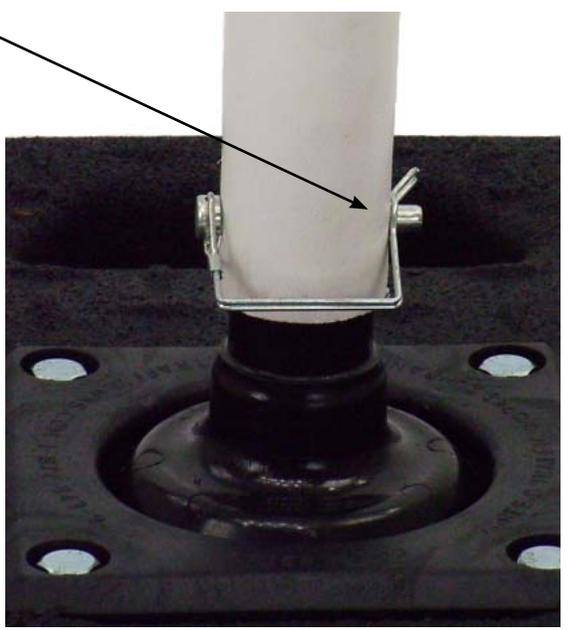

Note: Use only fabric or plastic sign substrates with the TD5275.

Our 32 lb and 22 lb rubber bases measure 22 inches wide X 26 inches long. All other bases are octagonal in shape and measure 16 inches on a side.

All bases for the TD5275 are made from 100% Post-Consumer Recycled Rubber, making this a very "Green" base indeed!

Quick Release Pin

High visibility lime-green reflective material makes this device a powerful tool for improving pedestrian safety. Make this a part of your Safe Routes To Schools program!

Three D Traffic Works gratefully acknowledges the assistance of CalRecycle in developing our extensive line of recycled rubber bases.
