

Benefits:

- Reduced repair and maintenance of dumpster enclosures
- Reduced injuries to workers when maneuvering collection containers off and on sidewalks

Manufacturing process: Crumb rubber made from recycled tires is blended with a polyurethane binder. After the blend is poured into molds, the mold press is heated and put under pressure for a few minutes. The molded products are then pulled out of the mold and cooled for 24 hours before shipment.

*A wide variety of high-quality, proven products are made from California's recycled tires.
