

LEED BD+C: New Construction | v4 - LEED v4

Enhanced Acoustical Performance – Exterior Noise Control

Possible 1 point

Intent

Improve or have no negative impacts on the outdoor acoustical environment as a result of new or major renovation building construction.

Requirements

Design and locate exterior noise sources¹ for new and majorly renovated buildings so that project noise levels at the nearest property line or public right of way are a minimum of 5 dBA below the existing ambient noise levels without the project, and no more than 60 dBA.
