About RE-REFINED MOTOR OIL... Re-refined oil is motor oil that has been made in part from the used oil collected from oil changes. Re-refined oil products are subject to the same standards as virgin oil. Many stores now carry re-refined oil with brand names such as America's Choice, Firebird, and Soar.

*The American Petroleum Institute (API) sets the re-refined and virgin oil performance standards.

RECYCLE USED OIL

NEVER MIX USED OIL with any other liquids! Mixed automotive fluids cannot be recycled.

CLEAN ALL SPILLS. On concrete/asphalt: soak up spilled oil with rags or cat litter; dig up visibly contaminated area. On dirt/gravel: wash area with mild cleaner. Call your local used oil coordinator or environmental agency for specific disposal information.

PREVENT SPILLS. Use a funnel when pouring. Make sure the new oil filter is secure. Do not overfill. Check your vehicle owner's manual for oil specifications and amount.

DRAIN used oil and filter for at least 12 hours. Both the used oil and the metal from the filter must be recycled.

BE PREPARED! Have ground cloth, rags, funnel, tools, oil pan, and a CLEAN plastic container with snap-on cap (if you use a plastic milk jug with container as "Used Oil." Avoid working on grass or dirt.

TIPS FOR AN ENVIRONMENT FRIENDLY OIL CHANGE
...it is easy being green!

RECYCLE OIL FILTER

- Receive $0.16 for every gallon of used oil returned to a certified used oil collection center.

SIDE 1 (Round 1)

PREVENT SPILLS CHECK FOR LEAKS

- **IT IS AGAINST THE LAW** to dump used oil—on the ground, in the trash, down storm drains, or down the sink or toilet.

More reasons to recycle used oil:

- Used oil can be re-refined for reuse. Purchasing re-refined motor oil saves natural resources and lessens US dependence on imported oil.
- Used oil keep your communities, environment clean.
- Helps you keep your water, and ground water and ocean.
- Prevents oil pollution in recreational waterways—rivers, and streams, bays, storm drains, soil, surface water, and ground water, by keeping oil from seeping into the ground.
- Protects the water supply, including your drinking water.

RECYCLING USED OIL BENEFITS YOU, YOUR FAMILY, AND THE ENVIRONMENT.

PREVENT POLLUTION!
