

Plan for Supporting Safe Collection and Disposal of Waste devices

As Required by California Public Resources Code section 47115-47116 and Minnesota Statutes
Chapter 286

The statutory requirements of California apply to four (4) of our products – AVONEX®, PLEGRIDY™, ALPROLIX® and ELOCTATE®. Outlined below are the actions Biogen has taken to date with regard to the foregoing products:

PLEGRIDY and AVONEX

- Biogen provides written information detailing the proper disposal of injector pens, needles and syringes to all PLEGRIDY and AVONEX patients in our PLEGRIDY and AVONEX Instructions for Use (“PLEGRIDY and AVONEX Instructions”).
- The PLEGRIDY and AVONEX Instructions direct patients to dispose of used injector pens, needles and syringes in a puncture resistant container.
- The PLEGRIDY and AVONEX Instructions advise patients that there may be state and/or local laws regarding the disposal of used injector pens, needles and syringes, and patients are further directed to consult their doctor, nurse or pharmacist to obtain instructions on how to dispose of their used injector pens, needles and syringes.
- The PLEGRIDY and AVONEX Instructions are readily accessible electronically on the Biogen website.
- The Biogen patient services cell center staff have been trained to relay the information contained in the PLEGRIDY and AVONEX Instructions to patients that seek information regarding the disposal of their Injector Pens and Sharps.
- Each new AVONEX patient that participates in our starter kit program is counseled regarding the safe disposal of syringes.

ALPROLIX AND ELOCTATE

- ALPROLIX and ELOCTATE are self-administered hemophilia therapies (ALPROLIX directed to patients with Hemophilia B and ELOCTATE is directed to patients with Hemophilia A) through licensed specialty pharmacies and home care pharmacies.
- Biogen works with these pharmacies and our own Patient Services Group to provide patients with Sharps containers and disposal programs in accordance with California medical waste requirements.
- Around the time of launch, Biogen informed all of our specialty and home care pharmacies in California of the relevant regulations to ensure that they have proper and effective Sharps disposal procedures in place. Biogen will, on a yearly basis, remind these specialty and home care pharmacies in California about the requirements of a sharps disposal program.
- To improve patient education on this topic, we have structured our ALPROLIX and ELOCTATE websites to include instructions on proper Sharps disposal.
- We have also provided patient guidance on the proper disposal of Sharps in the Instructions for Use (“IFUs”) with each ALPROLIX and ELOCTATE product package.
