Subject: Comments to AB 1497--Ms. Bobbie Garcia

Dear Ms. Garcia:

As a concerned citizen of the State of California, I would like to submit to you for the Board's consideration a comment regarding 21660.2 (c) (3), that informational flyers in English and the predominant second language in the area affected by the proposed permit hearing be distributed to the neighborhood. This will insure that a posting 300 yards beyond the facility will be more even and the information decimated to those residence who may not go by the facility and see the posting. The hiring of individuals to distribute the flyers to all residents in a larger geographical region will insure that more people are informed of the permitting process. The cost to send out several "runners" to distribute the notices would be very minimal and would achieve the Board's goal of an informed citizenry.

Thank you for entertaining my thoughts and comments.

Doug Kautzky
