

Comments to Form 303 reporting to CalRecycle

To: Emily Wang

Fr: Nicole Forte, Programs Manager, RecycleMore (West Contra Costa Integrated Waste Mgmt Authority)

- 1) Water programs want the mercury number broken down by types (elemental, thermometers etc) can the form have line items for this?
- 2) Electronic format and submission desired
- 3) What about the paint that is consolidated and sent overseas for Reuse? Ultimate disposition is not accounted for in this form
- 4) Reuse will be estimated due to fact that materials not taken the same month/year put into the reuse area. The can count for PaintCare rebate may be a better estimate
- 5) A yearly summary report of all programs published by CalRecycle would be good. We could see if we are reducing the volume collected. This should include final disposition as well.
