Please be advised that the San Joaquin County Environmental Health Department Solid Waste Local Enforcement Agency (LEA) received and has approved a Report of Facility Information (RFI) amendment to the Solid Waste Facility Permit for the Foothill Landfill. The LEA is certified by the Department of Resources, Recycling and Recovery (Calrecycle) to enforce state law and regulations at the solid waste sites within the County of San Joaquin, excluding the City of Stockton, including all active and closed landfills.

Description of the Project and the LEA's Determination

The Foothill Landfill is a permit 800-acre existing landfill site located at 6484 N. Waverly Road, Linden, CA. On October 27, 2010, the LEA received the application for a five year permit review and to amend the RFI for the Foothill Landfill. The owner, San Joaquin County, Public Works Department, Solid Waste Division (SJCSWD), submitted the Solid Waste Facility Permit (SWFP) application. The application was accepted as on November 8, 2010. The amendment included a new format that allows the document to flow better. The RFI also has an updated personnel and equipment list. The RFI amendment included the use of tarps as Alternative Daily Cover (ADC). The Preliminary Closure, Post Closure, Maintenance Plan was amended to include a new closure cost estimate and supporting documentation of costs using a third party contractor conducting the closure activities.

The LEA finds that the proposed change is consistent with all applicable certified and/or adopted CEQA documents, is consistent with State Minimum Standards, and does not conflict with the terms and conditions in the current solid waste facilities permit. The LEA approved the amendment on November 8, 2010.
