

# PLAYGROUND SURFACING PRODUCT TESTING DEMONSTRATION

**INTERNATIONAL TIRE CONFERENCE**  
BORDER-TIRE MANAGEMENT PARTNERSHIP  
*San Diego, California | May 3-9, 2008*

from **SCRAP TO PROFIT** 

Monday, May May 5, 2008

DK ENTERPRISES

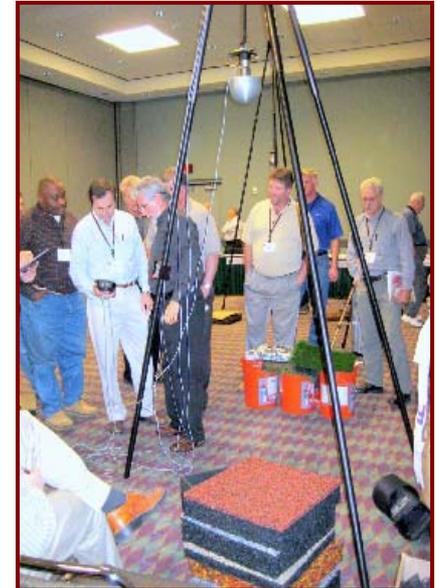

THE RECYCLERS CONNECTION

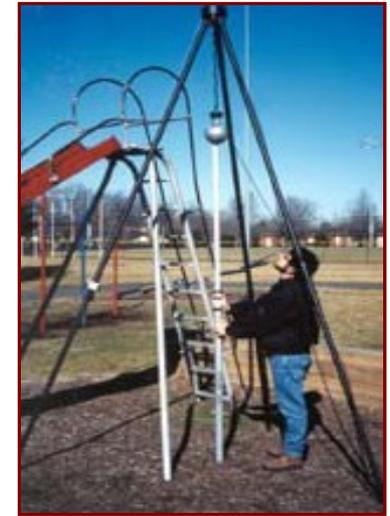

# PLAYGROUND SURFACING TEST

- ❑ Trained representatives demonstrate the use of the TRIAX 2000, a testing tool that records the G's, Head Injury Criteria (HIC) and velocity of each surface impact test as required by ASTM F1292 – 04
- ❑ Industry representatives provide poured-in-place and loosefill playground surfacing material samples to be tested during the testing demonstration

# PLAYGROUND SURFACING MATERIAL

- ❑ Review of playground surfacing materials
- ❑ Benefits to manufacturer to test product prior to providing the material to testing lab for ASTM testing
- ❑ Examine owner responsibility of acceptable playground surfacing material
- ❑ Discuss influences that impact playground surfacing materials

# TEAM PRESENTERS

- ❑ Denise Kennedy, DK Enterprises, consultant to the tire recycling and tire-derived product industry, specializing in product test plans and testing protocol, (916) 480-0443
- ❑ Jeff Davis, ABC Playground Safety, trained representative and inspector of playground and synthetic turf tests using the TRIAX 2000 and the “A” Missile, (310) 880-6126
- ❑ Rolf Huber, Canadian Playground Advisory, certified trainer world wide in the use of the TRIAX 2000 and the “A” Missile, (416) 410-3113
