ENVIRONMENTALLY PREFERABLE PURCHASES AND PRACTICES POLICY

Environmentally preferable purchasing protects human health and environmental well-being by reducing the procurement of goods and services that result in larger volumes of waste and pollutants. The Legislature declares that the responsibility of environmentally preferable purchasing shall be that of any agency that does procuring on behalf of the state (Chan, Statutes of 2002, Chapter 575), and this extends to grantees using state funds.

"Environmentally preferable purchasing (EPP)" as defined in PCC section 12400 means "the procurement or acquisition of goods and services that have a lesser or reduced effect on human health and the environment when compared with competing goods or services that serve the same purpose. This comparison shall take into consideration, to the extent feasible, raw materials acquisition, production, manufacturing, packaging, distribution, reuse, operation, maintenance, disposal, energy efficiency, product performance, durability, safety, the needs of the purchaser, and cost." In other words, EPP considers, among other things, the environment, performance and cost."
