*Product Vendor List current as of September 2016.*

### ***Recycled Post-Consumer Carpet Products***

More than 350 million pounds of carpet is discarded in California landfills every year—carpet that could be recycled into useful new products. The California Carpet Stewardship Program is working to develop markets for recycled post-consumer carpet via grants, technical assistance and promotion.

Post-consumer carpet is recycled by processors into fibers, backing filler material or plastic pellets, which can be used to make a broad range of products, including carpet, carpet tiles, carpet underlayment, and products for the automotive, transportation, and construction industries.

See over for a list of vendors offering products containing recycled California post-consumer carpet. *We recommend that you specify: "must contain California post-consumer carpet material" in all procurement transactions that include these products.*

### ***Procurement Grants***

In 2016, grants totaling \$500,000 (maximum grant of \$50,000) will be awarded for procurement of recycled post-consumer carpet products by California public agencies. Details on grant application timeline and supported products can be found here: [www.carpetrecovery.org/ca-grants/](http://www.carpetrecovery.org/ca-grants/).

### ***Keep in Touch***

CARE's California program has a monthly e-news to update stakeholders on developments in the program.
