RECYCLED CONTENT CERTIFICATION FOR CAPITOL AREA EAST END COMPLEX – BLOCK 225

This form is to be completed by a corporate officer of the product manufacturer for the contractor. The contractor must return the certification, completed for each product with recycled content as identified in the Project Specifications. Attach additional sheets if necessary.

Public Contract Code Sections 10233, 10308.5, and 10354 require all vendors and contractors to certify in writing, under penalty of perjury, to the state agency awarding a contract, the minimum, if not the exact percentage, of post-consumer and post-industrial material in the materials, goods, or supplies offered or used.

Public Contract Code Section 12205(a) requires all state agencies to require all contractors to certify in writing, under penalty of perjury, the minimum, if not the exact percentage, of post-consumer and post-industrial material in the materials, goods, or services provided or used.

---

Printed Name (a corporate officer) | Title | Date | Signature
--- | --- | --- | ---
(1) Product Category: (Fill in above, if applicable. This information is used to determine compliance with the State Agency Buy Recycled Campaign.)

1. Compost/Co-compost
2. Glass Products
3. Lubricating Oils
4. Paint
5. Plastic Products
6. Paper Products
7. Printing and Writing Papers
8. Solvents
9. Steel Products
10. Tires
11. Tire-derived Products

(2) Product category is used for State agency reporting. Products that are made from multiple material types should be reported in the product category of the material type representing most of the product. The amount of material used in the product can be measured by weight or volume. If, for instance, a chair is made from steel, aluminum, and plastic and most of the material, either by weight or volume, is plastic, report it as a plastic product. If, however, most of the product, either by weight or volume, is steel, report the purchase as a steel product.

(3) Identify the Construction Specifications Institute (CSI) Specification Section number for the product, as indicated in the Project Specifications.

(4) Below are products preliminarily identified in the Project Specifications as having minimum recycled content requirements. Refer to the Project Specifications for individual sections in the specifications for recycled content level that must be achieved. Recycled Content guidelines shall include, but not be limited to, the products below.

1. Parking Bumpers (Section 2760)
2. Fluid-Applied Waterproofing (Section 07140)
3. Concrete reinforcement (Section 03200)
4. Bentonite Waterproofing (Section 07170)
5. Structural steel (Section 05120)
6. Metal Decking (Section 05300)
7. Building Insulation (Section 07210)
8. Steel doors and frames (Section 08110)
9. Glazing (Section 08800)
10. Paints and Coatings (Section 09900)
11. Cold-Formed Metal Framing (Section 05400)
12. Gypsum board (Sections 09255, 09260, 09265)
13. Ceramic tile (Section 09300)
14. Acoustical ceilings (Section 09510)
15. Resilient flooring (Section 09650)
16. Carpeting (Sections 09682, 09686)
17. Metal Toilet Compartments (Section 10160)
18. Identifying Devices (Section 10400)
19. Architectural Woodwork (Section 06400)

(4) Virgin material content is that portion of the product made from non-recycled material, that is, the material is neither post-industrial nor post-consumer material.

(5) Post-consumer material is defined as “a finished material which would have been disposed of as a solid waste, having completed its life cycle as a consumer item, and does not include manufacturing wastes.” This is material such as a newspaper that is read, recycled and then made into recycled content newsprint or some other recycled product. Post-consumer material is generally any product that is bought by the consumer, used, and then recycled into another product.

(6) Post-industrial (also referred to as pre-consumer or secondary material) is defined as “fragments of finished products or finished products of a manufacturing process, which has converted a resource into a commodity of real economic value, but does not include excess virgin resources of the manufacturing process.” This is material such as newsprint that is trimmed from a roll in the paper plant that is returned to the beginning of the process to make recycled content newsprint. The material (product) did not get to the consumer before being recycled. Post-industrial material DOES NOT include post-consumer material. FOR EXAMPLE: If a Printing and Writing Paper contained 20% post-consumer material, you would indicate 20 in the post-consumer column and 80 in the virgin column. If the product had 40% secondary material and 20% post-consumer material, you would indicate 40 in the post-industrial column, 20 in the post-consumer column, and 40 in the virgin column.

(7) The sum of the percentages for virgin, post-consumer, and post-industrial content must equal 100 percent.
